Sprinkler System	For fire protection purposes, an integrated system of underground and overhead piping designed in accordance with fire protection engineering standards. The installation includes one or more automatic water supplies. The portion of the sprinkler system above ground is a network of specially sized or hydraulically designed piping installed in a building, structure, or area, generally overhead, and to which sprinklers are attached in a systematic pattern. The valve controlling each system riser includes a device for actuating an alarm when the system is in operation. The system is usually activated by heat from a fire and discharges water over the fire area.	1620 (2020)	120 (2020), 13 (2019), 13D (2019), 13E (2020), 13R (2019), 16 (2019), 1620 (2020), 1700 (2021), 2 (2020), 214 (2016), 25 (2020), 853 (2020), 909 (2017), 914 (2019)	1620 (2020)
